

FACILITY PROTECTION SYSTEM

The **VFC Facility Protection System** is a comprehensive, coordinated approach to complete Facility Protection from **lightning** and **transient currents**. It incorporates nationally and internationally recognized system designs to reduce **Transient Impedance**. This is critical for protecting today's digital facilities. No gimmicks. We use state of the art products, implementing Lightning Protection, Facility Grounding, Bonding, and Surge Suppression Systems. Our systems completely meet NFPA 780, UL 96A, IEEE, NEC, and LPI Standards making them eligible for UL or LPI Certification.
